

SANDI KHAING

Full Stack Developer | Cloud & DevOps Engineer

Japan | Open to International Opportunities

Email: sandi.devops@gmail.com | LinkedIn: [linkedin.com/in/sandi-khaing-93666360](https://www.linkedin.com/in/sandi-khaing-93666360)

PROFESSIONAL SUMMARY

Passionate Full Stack Developer with 8+ years of experience building scalable web applications, enterprise systems, and cloud infrastructure for clients in Japan, Singapore, and Myanmar. Strong expertise in backend and frontend development using PHP, Laravel, Python, React.js, and Next.js.

Experienced in AWS cloud services, Docker, Kubernetes, Terraform, CI/CD pipelines, and modern DevOps practices. Skilled in API development, cloud-native architecture, database design, and performance optimization.

Strong experience working in Agile/Scrum environments with international teams. Focused on writing clean, maintainable, and scalable code while continuously learning modern technologies.

TECHNICAL SKILLS

Programming Languages

- PHP
- Python
- JavaScript
- TypeScript
- HTML5
- CSS3
- JSON

Frontend Technologies

- React.js
- Next.js
- Bootstrap
- jQuery
- AJAX

Backend Technologies

- Laravel
- CodeIgniter
- CakePHP
- Smarty
- Spring Boot

Cloud & DevOps

- AWS
- Google Cloud Platform (GCP)
- Azure
- Docker
- Kubernetes
- HELM
- Terraform
- AWS CloudFormation
- CI/CD

Databases

- MySQL
- PostgreSQL
- SQL Server
- Oracle
- MongoDB

Tools & Platforms

- Git
- GitHub
- Backlog
- Linux
- VS Code
- Postman
- Xampp
- SourceTree

Methodologies

- Agile
 - Scrum
-

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - Aviatrix Certified Engineer
 - Google Cloud Platform Business Professional Accreditation
 - ISO 9001 Quality Management Skillfront Systems Associate™
 - Scrum Foundation Professional Certificate
 - Cyber Foundation Professional Certificate
 - ICSI CyberSecurity Essentials
-

PROFESSIONAL EXPERIENCE

System Engineer — Ansur Co., Ltd

Nov 2022 – Present | Japan

Responsibilities

- Developed enterprise web applications for Japanese clients using Laravel and Python.
- Built scalable frontend systems using React.js and Next.js.
- Designed and maintained RESTful APIs and backend services.
- Managed cloud infrastructure using AWS services including S3, CloudWatch, and Secrets Manager.
- Implemented CI/CD workflows and containerized deployments using Docker and Kubernetes.
- Participated in Agile/Scrum development processes and cross-functional collaboration.
- Performed debugging, maintenance, testing, and production support.

Key Achievements

- Improved system maintainability through modular architecture and clean code practices.
 - Supported cloud migration and deployment automation.
 - Enhanced application performance and operational stability.
-

PROJECT EXPERIENCE

Job Change Support System

2022 – 2023 | Japan

Project Overview

Recruitment and career support platform allowing users to search jobs, upload resumes, apply for positions, and manage career information.

Responsibilities

- Backend development
- Database design
- Frontend implementation
- Testing and maintenance

Technologies

Laravel, PHP, MySQL, Bootstrap 5, JavaScript, Git

DMO Cloud System

2024 | Japan

Project Overview

Cloud-based API and batch processing system integrated with AWS services.

Responsibilities

- API development
- Batch processing
- Cloud service integration
- Maintenance and operations

Technologies

Python, React.js, Next.js, AWS, CloudWatch, S3

Restaurant Reservation Management System

2019 – 2021 | Japan

Project Overview

Online restaurant reservation and payment management platform.

Responsibilities

- Backend and frontend development
- Database optimization

- Testing and deployment

Technologies

Laravel, PHP, MySQL, Linux, JavaScript

Human Resources Management System

2022 | Japan

Project Overview

Employee management and contract management system for enterprise clients.

Responsibilities

- Frontend development
- Backend development
- Database design
- Testing

Technologies

Java, Spring Boot, PostgreSQL, Azure Cloud Storage

Web Management Platform

2017 – 2018 | Singapore

Project Overview

Dynamic website management platform for sports club organizations with API integrations.

Responsibilities

- Web application development
- API integration
- Maintenance and testing

Technologies

Laravel, PHP, AJAX, Bootstrap, MySQL

CORE STRENGTHS

- Full Stack Web Development
 - Cloud Infrastructure & DevOps
 - Scalable System Architecture
 - RESTful API Development
 - CI/CD Automation
 - Problem Solving & Debugging
 - Cross-functional Team Collaboration
 - Agile/Scrum Development
 - International Project Experience
-

LANGUAGES

- English — Conversational
 - Japanese — Conversational (JLPT N3)
-

ADDITIONAL INFORMATION

- Available for international opportunities
- Experience working with multinational teams
- Strong adaptability and continuous learning mindset
- Interested in cloud-native systems and scalable platform engineering
